

Declaration on Regulation EC 1907/2006 (REACH)

In terms of the REACH regulation, we as a manufacturer of positioning systems have the status of a downstream user.

The chemicals we use for production (e.g. lubricants and greases) never reach the lower limit of 1 ton/year, so that we do not have to register or create technical dossiers according to the EU regulation.

This means that we rely on information from our suppliers and issue our declaration of no objection according to the information provided to us.

REACH declaration of no objection:

- 1. All products we supply to you comply with the obligations resulting from the REACH regulation.*
- 2. None of the products contains, according to the current state of knowledge, chemicals that are listed as substances of very high concern (SVHC = Substances of Very High Concern) in a concentration of more than 0.1% according to the candidate list (ECHA list), which is constantly updated by the EU.*
- 3. We do not import or purchase any of the SVHC listed substances ourselves. Neither are any SVHC listed substances intentionally released in our products.*
